

BrainStorm's NurOwn® Phase 2 ALS Clinical Trial and Biomarker Abstracts Accepted for Platform Presentations at the 70th Annual American Academy of Neurology Meeting in Los Angeles, California

HACKENSACK, N.J. and PETACH TIKVAH, Israel, Feb. 7, 2018 /PRNewswire/ -- BrainStorm Cell Therapeutics Inc. (NASDAQ: BCLI), a leading developer of adult stem cell therapeutics for neurodegenerative diseases, today announced that two scientific posters describing ALSFRS-R subgroup analyses and innovative micro-RNA biomarker data from the NurOwn® Phase 2 randomized double-blind placebo-controlled study will be presented as platform presentations at the American Academy of Neurology (AAN) Annual Meeting, to take place April 21-27th in Los Angeles, California.

Platform presentations:

"NurOwn® Phase 2 ALS Trial: ALSFRS-R Improvement is Reflected in Subscale Domains"

Session S38: "Best of" Session: Clinical Trial Updates in Neuromuscular Disorders on April 26, 2018

Presenter: Merit E. Cudkowicz MD, Chief Neurology Service, Director Amyotrophic Lateral Sclerosis Clinic, Co-Director Neuromuscular Division, Massachusetts General Hospital.

"Modulation of CSF miRNAs in ALS phase 2 study participants treated with MSC-NTF cells (NurOwn®)"

Session S25: Advances in Amyotrophic Lateral Sclerosis on April 24, 2018

Presenter: Ralph Z. Kern MD, MHS, Chief Operating and Medical Officer, BrainStorm Cell Therapeutics.

"Our Phase 2 placebo-controlled trial demonstrated promising clinical activity for NurOwn® in ALS, and the subgroup analyses confirm that ALSFRS-R subdomains contribute to this treatment effect. The CSF biomarker data confirms that micro-RNA released by NurOwn® may contribute to its therapeutic effect in ALS", said Ralph Kern MD, BrainStorm's Chief Operating Officer and Chief Medical Officer.

"We are pleased to have these scientific abstracts accepted at the prestigious AAN Annual Meeting, which is the largest North American Neurology conference. We are committed to continuing to understand the value that NurOwn brings to ALS through innovative clinical and scientific evaluation, and to advance the phase 3 pivotal study to bring a meaningful solution to ALS patients," commented BrainStorm's CEO Chaim Lebovits.

About BrainStorm Cell Therapeutics Inc

BrainStorm Cell Therapeutics Inc. is a biotechnology company engaged in the development of first-of-its-kind adult stem cell therapies derived from autologous bone marrow cells for the treatment of neurodegenerative diseases. The Company holds the rights to develop and commercialize its NurOwn® technology through an exclusive, worldwide licensing agreement with Ramot, the technology transfer company of Tel Aviv University. NurOwn® has been administered to approximately 70 patients with ALS in clinical trials conducted in the United States and Israel. In a randomized, double blind, placebo-controlled clinical trial conducted in the U. S., a clinically meaningful benefit was demonstrated by higher response to NurOwn® compared with placebo.
